

Who can help route the Medical Emoji work

13 JULY 2026 | 1 OF 3

Start with Microsoft routing, then use the separate official paths for emoji proposals and the UTC paper.

RECOMMENDED MICROSOFT ROUTE

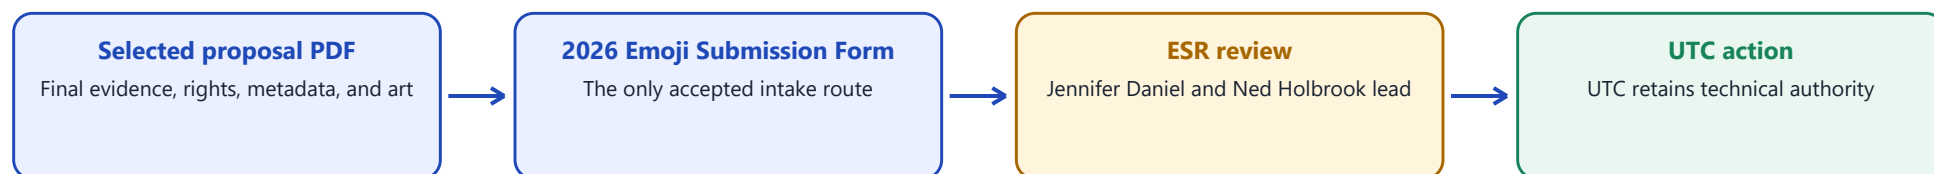

Public roles are confirmed; private Microsoft assignments still need confirmation

EXECUTIVE ROUTING Vishal Chowdhary can make the Microsoft introductions. His Unicode Board role does not decide technical outcomes.

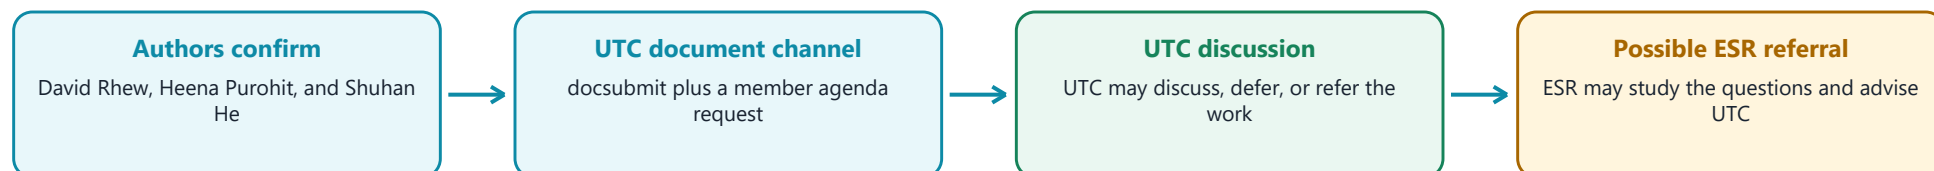

ROUTE 1 | Individual emoji proposals

Each selected candidate must be filed separately

ROUTE 2 | Health-related emoji coverage paper

A separate UTC document; it does not submit any emoji

WHAT MICROSOFT CAN HELP WITH

Confirm the member representative and delegates; advise on the UTC paper and agenda timing; identify Fluent Emoji, Segoe UI, font-engineering, and accessibility reviewers. Microsoft support cannot replace the submission form or promise an encoding outcome.

Who can help route the Medical Emoji work

13 JULY 2026 | 2 OF 3

Named contacts are ordered by practical usefulness, not by organizational rank.

Recommended start: Peter Constable for the technical path and Vishal Chowdhary for Microsoft introductions.

Peter Constable

FIRST CALL

Microsoft employee; Unicode Technical Vice President; UTC chair; Release Management chair. He represented Microsoft at UTC #187. Best first contact for process, agenda, and Microsoft routing.

Source: Unicode technical leadership; UTC #187 minutes

Vishal Chowdhary

EXECUTIVE SPONSOR

Microsoft Vice President of Science; Unicode Board director since 2026. Best executive connector. The Board does not select emoji or decide technical outcomes.

Source: Unicode Board of Directors

Jennifer Daniel

ESR CHAIR

Chair of the Emoji Standard & Research Working Group, which reviews new emoji proposals and develops recommendations for UTC. Individual proposal intake still requires the official form.

Source: Unicode technical leadership; Emoji technical page

Ned Holbrook

UTC + ESR VICE-CHAIR

Vice-chair of both UTC and ESR in Unicode's current leadership directory; Apple typographic engineer and UTS #51 co-editor. Useful second technical contact.

Source: Unicode technical leadership; UTS #51

Judy Safran-Aasen

CONFIRM ROLE

Represented Microsoft at UTC #187. A useful current Microsoft lead, but the public minutes do not identify her as Microsoft's primary delegate or alternate.

Source: UTC #187 minutes

Andrew Glass

ADJACENT MS STANDARDS

Microsoft Principal Product Manager; chair of the CLDR Keyboard Working Group; works on font rendering, input, and shaping. Useful standards and font connector, not an emoji intake gate.

Source: Unicode technical leadership

Unicode does not publish a complete current ESR roster or Microsoft's private delegate designations. Ask Peter or Vishal to confirm those roles internally.

The current central leadership directory lists Ned Holbrook as UTC vice-chair; a separate older UTC landing page still lists Craig Cummings.

Who can help route the Medical Emoji work

13 JULY 2026 | 3 OF 3

Use these contacts for administration, specialist questions, or escalation after the normal route is clear.

These are not substitutes for the formal submission channels and are not first-line proposal reviewers.

Michelle Perham

OPERATIONS

Unicode Program & Production Manager. Relevant to document administration and posting. Use the official document channel rather than guessing a personal address.

Source: Unicode executive officers and staff

Mark Davis

UTS #51 SPECIALIST

UTS #51 co-editor, Unicode cofounder, and CLDR chair. A specialist for emoji specification, data, and interoperability questions, not routine intake.

Source: UTS #51; Unicode technical leadership

Cathy Wissink

GOVERNANCE ESCALATION

Unicode Board chair and interim CTO; formerly led Microsoft's UTC participation. Appropriate only for a genuine governance or process escalation.

Source: Unicode executive officers and staff

Toral Cowieson

ORGANIZATIONAL ESCALATION

Unicode CEO. Relevant to a membership or organizational issue, not to technical review of an emoji proposal.

Source: Unicode executive officers and staff

MICROSOFT ROLES PETER OR VISHAL SHOULD IDENTIFY

1. Primary Unicode Organizational Member Representative
2. Primary UTC delegate and alternate
3. Microsoft ESR delegate or participant, if one is designated
4. Fluent Emoji, Segoe UI, font-engineering, and accessibility owners
5. Legal or IP reviewer only if Microsoft contributes artwork, coauthors, or an implementation statement
