

Who can help route the Medical Emoji work

13 JULY 2026 | 1 OF 1

Microsoft employees and public Unicode roles to confirm for Medical Emoji routing.

Use this as the Microsoft-facing contact page. Public sources confirm the roles below; Microsoft's current member representative, UTC delegate, alternate, and ESR participant still need internal confirmation.

Peter Constable

FIRST TECHNICAL CALL

Microsoft role: Works at Microsoft on Unicode, internationalization, text display, and fonts. Unicode role: Technical Vice President; chair of the UTC; chair of the UTC Release Management Working Group. What he does at Unicode: chairs the technical committee, manages UTC process and agenda, and can identify the correct Microsoft delegate and ESR route.

Sources: Unicode technical leadership; UTC #187 minutes

Vishal Chowdhary

EXECUTIVE ROUTING

Microsoft role: Vice President of Science; leads the Office AI Science team in Microsoft 365 Copilot. Unicode role: Unicode Board director, 2026 to present. What he does at Unicode: governance and member-company representation. He can help identify Microsoft owners, but the Board does not decide emoji outcomes.

Judy Safran-Aasen

UTC ROLE TO CONFIRM

Microsoft role: listed in UTC #187 minutes as representing Microsoft; current internal title and assignment are not public in Unicode sources. Unicode role: Microsoft participant in the latest published UTC minutes. What she does at Unicode: likely standards participation to confirm; ask whether she is the primary UTC delegate, alternate, or another Microsoft UTC participant.

Source: UTC #187 minutes

Andrew Glass

ADJACENT STANDARDS

Microsoft role: Principal Product Manager in the Experiences and Devices Group. Unicode role: chair of the CLDR Keyboard Working Group. What he does at Unicode: keyboard and input standards. Useful for adjacent Microsoft routing around input, font rendering, and language support, not the emoji proposal intake gate.
